700T series Yaw & pitch solutions

Bonfiglioli products are used in the latest state-of-the-art wind turbines to control the necessary functions of pitch and yaw drives systems. The 700T series planetary speed reducers are used by a number of leading wind turbine manufacturers thanks to their advanced technical features, creating the highest level of performance.

Torque Range
2500 ... 300000 Nm

Gear Ratios
60 ... 3000

Active Cube servo drive Versatility, promptness, accuracy

A full series of solution & servo drives, compact and flexible, is suitable to be used in wind turbine's drives where outstanding performance in terms of accuracy and response time are requested, as for example Pitch Drives.

Pitch Drives Power Range
7.5 up to 37kW / 3-Phase 320V...528V / 45Hz...66Hz
