

JHS Series Spherical Roller Bearings

***Ultrahigh functionality bearings
for revolutionizing industrial
machinery and equipment.
This is the JHS Series.***

Aiming to ensure extremely high performance, we utilize advanced designs and processing technologies in the development of new materials.

Improved roller fatigue life. Superior toughness and corrosion resistance. Moreover, compared to other bearings, the JTEKT Hyper Strong (JHS) Series is a new-generation bearing providing unparalleled high capacity, abrasion resistance and high-speed performance.

JHS bearings support faster innovation, improvement and streamlining at manufacturing sites everywhere.

Hyper functionality worthy of the JHS Series name.

New lineup of Spherical Roller Bearings

More compact, yet same capacity. Same size, but faster and longer service life. Additionally, the load on the cooling system has been reduced. We are also responding to a variety of needs such as improving quality and productivity onsite, streamlining and saving energy.

JHS Series Spherical Roller Bearings

JHS Series Spherical Roller Bearings are satisfy the demanding needs of our customers. Manufactured using innovative materials, an optimal internal design and a standardized dimension stabilizing treatment, these bearings have a longer service life, faster rotation speed, enhanced axial load performance and can be used in high-temperature applications.

Innovative materials

Longer service life through cleaner bearing materials
Bearing service life increased by through careful selection and management of materials

Optimal internal design

① Dynamic load rating/static load rating increased through design optimization

JHS Series compared to existing products

Dynamic load rating

Max. 1.15 times

(compared to our existing products)

Static load rating

Max. 1.30 times

(compared to our existing products)

② Roller position stabilized

► Service life increased through improved lubrication ability

Rising bearing temperature suppressed through roller position stability

Longer service life

Max. 4times

(compared to our existing products)

Speed increased

Permissible rotation speed

Max. 25%UP

(compared to our existing products)

Axial load performance

Max. 20%UP

(compared to our existing products)

High-temp use

up to 200°C

Bearing composition diagram

Outer ring

- JTEKT specification steel

Roller

- Roller maximized
- Number of rollers increased
- Roller position stabilized

Inner ring

- JTEKT specification steel

High-temperature applications supported

Standard for dimension stabilizing treatment introduced, realizing applicability in temperatures as high as 200°C and thereby enabling use in a wide variety of environments.
